

Navman 575

For those who demand performance.

The Navman 575 is beautifully crafted and packed with features. With a stunning 4.7" widescreen, slim design and new Spirit QuickStart™ software, this device is a sat-nav for those who demand performance.

The Navman 575 also features built-in Traffic information so you'll always know what's on the road ahead, saving you valuable time by avoiding hold-ups and congestion.

Of course great navigation comes as standard with the Navman 575 which includes IQ Routes™, an intelligent feature that anticipates congestion on roads at peak times so that they can be avoided. The data utilised is provided by millions of fellow drivers, thus their experiences and knowledge can assist you during your journey.

LearnMe™ is the new, intelligent capability for your Mio. The more you use it, the more it learns your driving style and routing preferences. After a short period of use, your Mio will start to calculate routes that suit you personally, rather than telling you how to drive. Coupled with IQ Routes™ the Mio Navman 575 will become *the* Personal Navigation device for you. Other powerful features include 3D Junction Views for clear guidance at intersections and Mio's TruMap™ views.

To complete the package, your Navman 575 comes with Mio's Total Refresh latest map guarantee because we know that the latest maps and accuracy are essential.

Mio now offers you the choice of renting overseas maps for just a small cost. You may choose between 3, 7 and 30 days, making them ideal for short trips and holidays.
